"... the series which all immunologists need on their shelves."

—THE PHARMACEUTICAL JOURNAL

ADVANCES IN IMMUNOLOGY

Edited by FRANK J. DIXON and HENRY G. KUNKEL

This serial publication contains comprehensive articles covering the current research in immunology, especially in its theoretical and fundamental aspects. The contributions are written by authorities in the individual fields considered, and deal with problems of cellular and humoral immunity, such as the nature and biological roles of the antibody response and of delayed type hypersensitivity, the nature and function of complement, immunochemistry, problems of tolerance in relation to transplantation and to tumor immunity, and antigenic differences within and between species.

FROM REVIEWS OF PUBLISHED VOLUMES:

"... the editors are to be commended on the consistently high standards maintained throughout this and previous volumes. The series deserves the widest acceptance from student and specialist alike."

—ARCHIVES OF BIOCHEMISTRY AND BIOPHYSICS

"This is another stimulating and informative volume, of pleasing presentation, in the series which all immunologists need on their shelves."

—THE PHARMACEUTICAL JOURNAL

"The thoroughness of the presentations by the authors makes for interesting reading. The chapters are excellent reviews on the subject matter and bring into focus many of the perplexities in immunology. Each chapter is well documented with an excellent review of pertinent literature. The book will be a welcome addition to the reference library of the advanced student and the research worker in immunology."

—JOURNAL OF THE AMERICAN VETERINARY ASSOCIATION

Complete information on each volume in the series is available on request.

Take advantage of the convenience of our Continuation Order Plan:

Your CONTINUATION ORDER authorizes us to ship and bill each volume automatically, immediately upon publication. This order will remain in effect until cancelled. Please specify volume number with which your order is to begin. Please direct all inquiries and orders to the Sales Department.

ACADEMIC PRESS

A Subsidiary of Harcourt Brace Jovanovich, Publishers

111 FIFTH AVENUE, NEW YORK, N.Y. 10003

24-28 OVAL ROAD, LONDON NW1 7DX

Academic Press publishes books and journals in many areas of the biological, medical, and biomedical sciences including:

anatomy, histology and cell biology
biochemistry and molecular biology
cancer research and oncology
cardiology and the vascular system
environmental science
food science and nutrition
genetics and human development
immunology and hematology
microbiology and virology
neurosciences, neurology and psychiatry
oceanography and marine biology
ophthalmology and otolaryngology
pathology, clinical pathology and parasitology
pharmacology, therapeutics and toxicology
physiology, biophysics and biostatistics
radiology and nuclear medicine
reproductive and perinatal medicine

For a list of titles in your subject area,
please write to the publisher, attention:
Sales Department.
